

**Comments Template on
Draft proposal for Quantitative Reporting Templates**

**Deadline
20 January 2012
12:00 CET**

Name of Company:	Lloyd's	
Disclosure of comments:	Please indicate if your comments should be treated as confidential:	Public

Please follow the following instructions for filling in the template:

- ⇒ Do **not** change the numbering in the column "reference"; if you change numbering, your comment cannot be processed by our IT tool
- ⇒ Leave the last column empty.
- ⇒ Please fill in your comment in the relevant row. If you have no comment on a paragraph or a cell, keep the row empty.
- ⇒ Our IT tool does not allow processing of comments which do not refer to the specific numbers below.
 - Certain rows represent a group of cells with similar information (ex : TP - E3- cells A17-A31-J16 for a given triangle in TP-E3)
 - Cells that refer to formulas are not mentioned in specific rows; in case you have comments on formulas, please make them in the cell "general" for the given template
 - In spreadsheets & LOGs, certain cell number may seem like they are missing (ex : going directly from cell B1 to cell B3); this is normal, as they may refer to a previously existing cell that has been deleted during informal consultations, and cell numberings have not been changed for interal consistency purposes
 - If your comment refers to multiple cells or paragraphs, please insert your comment at the first relevant paragraph and mention in your comment to which other cells or paragraphs this also applies.
 - If your comment refers to subparagraphs or specific cells within a group, please indicate this in the comment itself.

Please send the completed template, in Word Format, to

cp009@eiopa.europa.eu. Our IT tool does not allow processing of any other formats.

The numbering of the paragraphs refers to this Consultation Paper, the numbering of cells refers to the accompanying spreadsheets and LOGs, the reference to "General", "Purpose", etc. refers to summary documents.

Reference	Comment	
General Comment	These templates are still not final and hence there is still uncertainty in terms of what changes are expected in future. Undertakings are in the process of reviewing and implementing reporting systems and processes capable of meeting Solvency II reporting requirements. To assist the insurance industry in this area, we propose that EIOPA should aim to release updated forms as soon as possible even though the final approval process of the materials will not take place until some time later this year.

	<p>Since AS9A is greyed out we have assumed that this is supposed to refer to A9A (same case with AS9B – AS9F below). Comment on this line also relates to all the other Investment funds lines i.e. AS9A – AS9F.</p> <p>Where look-through procedures on investment funds cannot be performed, for capital purposes, undertakings are allowed to either use their investment mandate or treat these as equity global or other. Can the same approach be adopted on the balance sheet and hence disclose the investment fund amount on A9A i.e. “including equities in investment funds”?</p> <p>We propose that where an undertaking cannot be able to obtain underlying class of investments through look-through procedures, breakdown of the investment funds required in the balance sheet should be done either by use of investment mandate or report this as equity (similar to what is done for SCR calculation).</p>

BS-C1- cell AS23		
BS-C1- cell A27	It has been indicated on the table in the LOG , that cash and cash equivalents refers to CIC 71 &72 (cash and transferable deposits). Solvency II uses IFRS as a proxy and as per IAS 7, Statement of cash flows, cash equivalents are described as “short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value i.e. with maturity of 3 months or less from the date of acquisition” . Following this definition, the composition of cash and cash equivalents could extend beyond that indicated on the LOGs, for example, some money market funds could meet this definition. If that is the case, should cash and cash equivalents refer to CIC 71,72 and 79 or should description of CIC 72 be expanded to incorporate short term investments meeting requirements under IAS 7?

Country - K1- cell E1	<p>This comment relates to cell E1-E4</p> <p>On the LOGs, commissions is defined as 'expenses arising from the acquisition of insurance contracts'. Further guidance is required on whether this should include only brokerage costs or it should also include fees paid and other direct costs incurred on acquisition of insurance contracts.</p>

Cover - A1A & Q- General	<p>We do not support the proposed requirement to report expenses, for example, investment management expenses by Line of Business (LOB). This is because some of these expenses are not managed on a LOB basis and any such reporting could potentially lead to arbitrary allocation of these expenses. We propose that expenses should only be requested at a level of granularity that is meaningful.</p> <p>In some cases, it is not clear from the LOG whether the expenses reported in this form are incurred expenses or actual cash flows. Clarification would be appreciated. If actual cash flows are required, it would make comparison difficult with Premiums written which is also included on the form. We propose that expenses should be reported as incurred in the period (and where relevant should include expenses related to premiums on unaccepted business).</p> <p>In the case of A1Q, it is not clear what expenses should be included in 'expenses paid' and 'other expenses'. Clarification regarding this would be appreciated.</p>

VA - C2A- General	We consider the analysis of changes in own funds to be complex. The analysis across the three templates, comprising investments, technical provisions by LOB and own debt and other items is extensive and very granular. In particular, the analysis of movements in technical provisions is likely to be very onerous. Whilst we agree with the objective of such analysis, we believe that more summarized reporting would provide sufficient information for useful analysis and be more cost effective.

	<p>period, at last reporting period (or, if acquired during the year, at acquisition price). It measures the amount of sales (using last reporting value).</p> <p>By applying the above proposed approach, is there a double counting in the calculation of the closing value of investments, cell O5?. For example, assuming nil opening balance and purchases of EUR400 of investments and that were all subsequently sold at profit of EUR100, the closing value would be EUR100 even though the reality is that it is nil.</p> <p>We propose that the narrative should be “Value of investments divested during the period, at the sales amount”</p>

MCR - B4A & B4B – General	We welcome EIOPA’s proposal to allow the use of estimates in the calculation of the quarterly MCR i.e. in terms of technical provisions and written premiums. However, further guidance would be appreciated on the level of estimates that will be acceptable. Given that an assessment of the SCR will be needed on a quarterly basis for the purpose of calculation of the corridor used in the MCR calculation, we propose that further guidance should be provided and in particular in the calculation of the Q4 MCR. Q4 MCR will be reported in the following year, for example, Q4 2014 MCR will be reported 8 weeks after the end of 2014 and by this time, the 2015 SCR will be known. Should the 2014 SCR still be used in the calculation of the Q4 2014 MCR or should the new known SCR i.e. 2015 be used ?

	<p>This comment applies to cells C2 – C17.</p> <p>Further guidance should be provided as to the definition of written premium. It is not clear whether undertakings should consider their credit arrangements when determining written premium.</p> <p>We propose that the definition of written premiums should be as follows: <i>"Premiums due from the insurance contracts written in the financial year regardless of the fact that such amounts may relate in whole or in part to a later financial year."</i></p> <p>This means that premiums relating to contracts incepting in the financial year being reported that were written in the previous financial year will not be included, but premiums written in the current financial year but relating to the following financial year (unincepted premiums) will be included.</p>

Assets - D1- General	<p>Investment funds This comment also relates to D4 To be able to reconcile the funds disclosed in D1 to look-through information on D4, there should be a column in both templates that requires unique investment funds ID code. Our assumption is that the on D1 and D4, the ID code would be the investment fund ID code.</p> <p>Cash and cash equivalents</p> <p>It has been indicated on the table in the LOGs reconciling amounts in D4 to those in BS-C1 , that cash and cash equivalents refers to CIC 71 &72 (cash and transferable deposits). Solvency II uses IFRS as a proxy and as per IAS 7, Statement of cash flows, cash equivalents are described as “short term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value i.e. with maturity of 3 months or less from the date of acquisition”. Following this definition, the composition of cash and cash equivalents could extend beyond that indicated on the LOGs, for example, some money market funds could meet this definition. If that is the case, should cash and cash equivalents refer to CIC 71,72 and 79 or should description of CIC 72 be expanded to incorporate short term investments meeting requirements under IAS 7?</p>

Assets - D1- cell A26	The total Solvency II amount is defined as including accrued interest. IFRS numbers are to be used as Solvency II numbers and Solvency II investment amounts exclude accrued interest as this is treated as receivable. Hence the amount in this cell will not agree to the balance sheet. We propose that this amount should exclude accrued interest as accrued interest is also captured on A30.

Assets – D4- General	<p>This comment also relates to D1 To be able to reconcile the funds disclosed in D1 to look-through information on D4, there should be a column in both templates that requires unique investment funds ID code.</p> <p>Information on investment funds should be provided on this template on a look-through basis. Based on IAS 7 definition of cash and cash equivalents, there could be some money market funds included as cash and cash equivalents. Should look-through procedures be performed on these funds and disclosed on this form or should information required on this form only relate to the investment fund amount included in the balance sheet (BS-C1), A9? Further clarification on this would be appreciated. We propose that look-through procedures should only be applied to the investment funds amount included in the balance sheet(BS-C1), A9. Hence total amount disclosed in D4 should agree to BS-C1,A9.</p>

Assets – D4- Frequency	This form is required on a quarterly basis. We consider this requirement to be onerous for undertakings to provide and will produce a vast amount of data which we question will be of use to supervisors. We propose that this analysis should be required only on an annual basis as we believe information provided in the balance sheet is adequate.

Assets - D4- cell A7	<p>In the LOG, the general comment states that “Split, for all and each investment fund, by main asset categories, main geographical zones and currency (local or foreign)”.</p> <p>In the LOG comment against this line states that “ Total invested amount in the asset category. This corresponds to the amount invested by asset category through investment funds”.</p> <p>Considering the first statement above requires listing of asset category for each investment fund, should the amount required in the cell be the total amount for asset category in each fund or should it be the total amount for the asset category in all the investment funds as per the second statement?</p> <p>We believe that it would be logical for the amount to be total for asset category for each</p>

Comments Template on Draft proposal for Quantitative Reporting Templates		Deadline 20 January 2012 12:00 CET
TP – E2- General		
TP – E2- Purpose	The default length of the triangles has been set at 15 years. We propose that the default length of the triangles should be set at 10 years in the first year of Solvency II reporting ie 2014, but this should be increased gradually year by year to 15 years. By setting this at 10 years, the template would be consistent with E4 that also requires 10 years of historical data and also IFRS.

TP – E3- General	<p>This form requires information to be reported by accident year/underwriting year and EIOPA is yet to decide on which basis to adopt. However they have indicated that this might be left to the discretion of the national supervisors. We would propose that each undertaking should be permitted to decide what basis to carry out its reporting as long as this is done on a consistent basis.</p> <p>We note that the number of years required to be reported has been increased from 10 to 15. We consider this requirement to be excessive and onerous. We appreciate that this information may be in undertakings’ accounting records but the existing claims triangles will not be in the</p>

	<p>currencies and lines of business being required on this template. Hence this will involve significant amount of work to get the information in the required format.</p> <p>We propose that for gross claims paid and gross reported but not settled claims (RBNS), the triangles should be set at 10 years. In the case of best estimate claims provisions, the triangle should only be required from the first year of Solvency II implementation i.e. 2014</p> <p>Salvage and subrogation Most of the systems do not capture this information and this is generally reported as part of claims paid. We propose that this triangle is removed and amounts relating to salvage and subrogation to be included in the claims paid triangle.</p>

	This comment also applies to AM1	
Re - J2- cell AG1	Insurance undertakings are in the process of making changes to their systems to ensure they will be able to meet Solvency II reporting requirements. To assist in this process, EIOPA should provide an indication as to when they expect to issue these codes.
