Peer Review on Joint On-sites:

Discussion on Scope

IRSG,
24.06.2014
Frankfurt am Main

Why Peer Reviews?
Overview (1/2)

- The peer review process has a central role in strengthening the consistency and quality of supervisory practices and outcomes.

- EIOPA conducts regular thematic peer reviews across all its members in order to create common supervisory culture.

- EIOPA sees important opportunities for peer review projects which encourage collective and collaborative approaches by EIOPA members, in dealing with the supervisory issues currently confronted.

- The added value of EIOPA peer reviews is driven largely by the EU-wide perspective of its members, which allows the achievement of common understanding, the exchange of experience and the identification of best practices, where possible.

Why Peer Reviews?
Overview (2/2)

- The peer reviews encourage open dialogue among national supervisory authorities (NSAs), as being peers to each other NCAs explore together actual supervisory practices and look for solutions and improvements.

- The peer reviews are based on the interaction among the EIOPA Review Panel, the teams of reviewers with the heads of NCAs. This interaction includes communication through visits, conference calls to NCAs, individual evaluation reports to NSAs and commitments for action on behalf of the heads of the NCAs.

- The responsibility for approving the final reports from the peer reviews, which contain recommendations and best practices, lies with the EIOPA Board of Supervisors, as the highest decision-making body of EIOPA.

# EIOPA Peer Reviews Process: Approach and Methodology

eiopa

Review Panel decision on visits / conf. calls

Review Panel discussion and agreement on Findings Recommendations, Best Practices

BoS approval of Findings Recommendations, Best Practices

Self assessment	Field Work: Visit / Conf. Calls	Individual Evaluation Reports + Individual written responses from NCAs	Final Report + Recommendations + Best Practices	Follow-up (after 1 year)

- EIOPA Methodology for Conducting Peer Reviews is available at:

Peer Review on Joint On-sites

eiopa

- **Proposed Scope**

  1. Trigger/decision to proceed with a Joint Onsite Inspection

  2. Planning

  3. Execution

  4. Analysis

  5. Follow up/Communication

  6. Enforcement measures

Question to IRSG:
Are there any particular issues, which the peer review should focus on?
